

1. Computer Kya Hai?

Computer aik **electronic machine** hai.

Ye humein madad karta hai:

- Data store karne mein
- Data process karne mein
- Mushkil masail hal karne mein
- Kaam jaldi aur sahi tareeqay se karne mein

Simple Definition

Computer aik electronic device hai jo data leta hai, usay process karta hai aur useful information deta hai.

2. Computer Ki Khususiyaat (Characteristics)

- Bohat fast kaam karta hai.
 - Accurate (sahi) result deta hai.
 - Thakta nahi hai.
 - Zyada data store kar sakta hai.
 - Instructions milne ke baad automatically kaam karta hai.
-

3. IPO Cycle

Har computer **IPO Cycle** follow karta hai.

I = Input

Input ka matlab hai computer ko data dena.

Input Devices

- Keyboard
- Mouse
- Scanner

- Microphone
-

P = Process

Process ka matlab hai computer data par kaam karta hai.

Ye kaam **CPU** karta hai.

CPU

CPU ko **Computer ka Brain (Dimagh)** kaha jata hai.

O = Output

Output wo final result hota hai jo processing ke baad milta hai.

Output Devices

- Monitor
- Printer
- Speaker

Formula

Input → Process → Output

4. Hardware

Hardware computer ke wo parts hain jinhein hum **dekh aur touch kar sakte hain**.

Examples

- Monitor
 - Keyboard
 - Mouse
 - CPU
 - Printer
-

5. Software

Software instructions ya programs hote hain.

Inhein **touch nahi kiya ja sakta**.

Ye hardware ko batate hain ke kya kaam karna hai.

Examples

- Windows
 - MS Word
 - Paint
 - Games
-

6. Software Ki Types

A. System Software

Ye poore computer ko control karta hai.

Example

- Windows (Operating System)
-

B. Application Software

Ye kisi khaas kaam ke liye use hota hai.

Examples

- MS Word
 - Paint
 - Calculator
 - Games
-

7. Hardware aur Software Mein Farq

Hardware

- Touch kiya ja sakta hai.
- Physical parts hote hain.
- Example: Keyboard, Mouse

Software

- Touch nahi kiya ja sakta.
 - Programs aur instructions hote hain.
 - Example: Windows, MS Word
-

8. AI Kya Hai?

AI ka full form Artificial Intelligence hai.

AI machines ko insanon ki tarah **sochne, seekhne aur decision lene** ki salahiyat deta hai.

Simple Definition

AI wo technology hai jo machines ko insanon ki tarah sochne aur seekhne ke qabil banati hai.

9. AI Kya Kar Sakta Hai?

AI:

- Data se seekhta hai.
 - Faislay karta hai.
 - Waqt ke sath behtar hota jata hai.
 - Repeat hone wale kaam automatically karta hai.
 - Time bachata hai.
 - Accuracy barhata hai.
-

10. AI Ki Examples

- ChatGPT
- Siri

- Alexa
 - Google Assistant
 - Netflix Recommendations
 - YouTube Recommendations
 - Face Unlock
 - Google Maps
 - Shopping Apps
 - Email Spam Filter
-

11. Important Points

- Computer aik electronic device hai.
- CPU computer ka brain hai.
- IPO ka matlab **Input → Process → Output** hai.
- Hardware ko touch kiya ja sakta hai.
- Software ko touch nahi kiya ja sakta.
- Windows System Software hai.
- MS Word Application Software hai.
- AI ka full form Artificial Intelligence hai.
